Resume

I'm 22 years old and in the 7th period of bachelor's degree in Computer Science. I've two years of professional experience and four years of knowledge, so i'm looking for an opportunity of **Software Engineer** position on labour market where i can collaborate with my knowledge and skills along with my team for the company's growth.

Education

- Undergraduate - 7th period of bachelor's degree in Computer Science in UNESA – Estácio de Sá University;
- B2 – Upper Intermediate English Level.

Experience

Globo (Currently - 6 month internship)

I collaborate with my team and squad in data science service with data analysis and studies to work at Globoplay. Working with:

- Data pipeline (Google Analytics 360/ Google Analytics 4 and Grafana + Google Big Query + Google Looker Studio/ Data Studio);
- Big Data querying with Google Big Query data warehouse;
- Indicators, reports and KPIs with Looker Studio;
- SQL and NoSQL database administration;
- SQL database administration;
- GTM - Google Tag Manager;
- Data Validation;
- Data Modeling;
- Data Mapping and Explorer with Moqups;
- Logging and Monitoring;
- A/B testing;
- Insight Presentations;
- Technical documentations with Atlassian Confluence pages;
- Figma for prototyping;

- Agile Methodologies (Scrum and Kanban Framework) using the Jira, Confluence and Trello tools.

HeadMind Partners (7 month working as trainee)

I collaborated with consultants in customer service with development, debugging and testing codes in a consultative way using high Software Development technologies in market. Working with:

- RESTful APIs;
- Hexagonal Architectures with Kotlin and Spring Boot;
- MVC Architectures with Node.js, RubyOnRails and .NET Framework;
- SQL and NoSQL database administration (SQLite, PostgreSQL, Redis, Firebase, Oracle database and MongoDB);
- Data Modeling;
- Web Stacks (MERN, RoR);
- Fuzzy logic and OCR;
- Figma for prototyping;
- CI with GitHub Actions and Jenkins;
- Agile Methodologies (Scrum and Kanban Framework) using Trello and Azure DevOps tools.

EZOps.cloud (6 month working as intern)

I created technical documentations and helped my team with cloud infrastructures solutions in customer service in a consultative way using high DevSecOps technologies in labour market. Working with:

- DevOps pipeline (Git and Github/Bitbucket + Docker + AWS infrastructure services with IaC using AWS Cloudformation);
- AWS Cloud Architectures Solutions;
- Dockerization of applications and containers orchestration with Docker Tools;
- Distributed systems;
- Computer networking;
- RESTful APIs;
- API Serverless (AWS Lambda + Amazon API Gateway + AWS DynamoDB);
- MVC Architectures with Laravel and Node.js;
- Client-server model;
- Web Stacks (LAMP, LEMP)
- Linux Administration and Web Server hosting (Amazon Linux, Ubuntu, Fedora, Red Hat and Kali Linux) for AWS EC2 instances;
- SQL and NoSQL database administration (MongoDB, PostgreSQL, MySQL, AWS DynamoDB and AWS RDS);
- Technical documentations with Github repositories;
- CI/CD with AWS Commit, CodePipeline, Codebuild and Codeploy;
- Logging and Monitoring with AWS Monitoring Tools;
- Agile methodologies (Scrum and Kanban framework) using the Trello and Easy Readmine tools.
